North Coast Stoneware

North Coast Stoneware is a tribute to the art pottery expression in Northern California in the 1970's. McIntyre was among the pioneers in California's art tilemaking, employing studio pottery materials and techniques in the production of residential and commercial ceramic tiles. Glazes in this series reflect our natural landscape's textures and colors. McIntyre North Coast Stoneware looks great with other natural materials like stone, wood and fabrics.

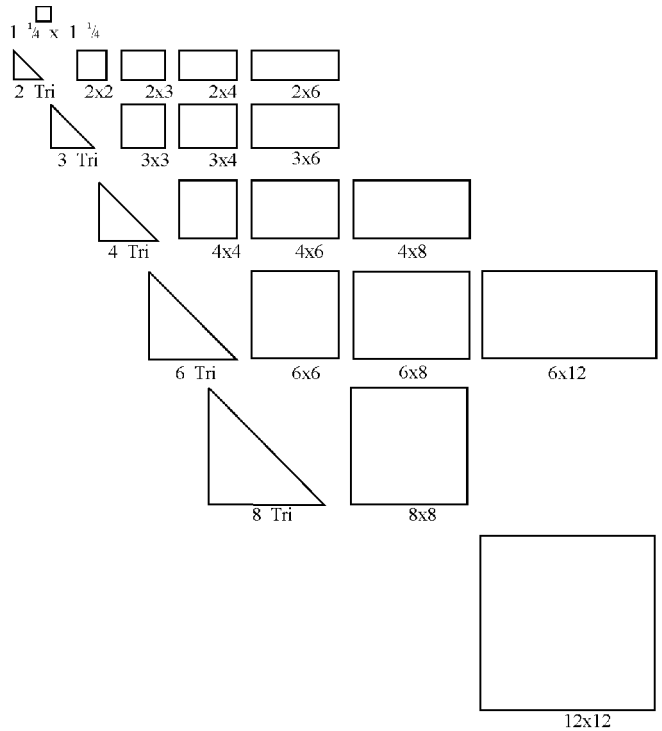

Glazes featured in this series are colorful, shiny and slightly transparent so that the stoneware claybody shows behind the glaze. The glaze surface is very hard and suitable for use on counters, fireplaces and hearths. Check the glaze hardness in the Specifications Catalogue.

This tile is vitreous and may be used in wet or frosty applications, inside and outside.

Tile sizes: 1 1/4 x 1 1/4, 2x2, 2x3, 2x4, 2x6, 3x3, 3x4, 3x6, 4x4, 4x6, 4x8, 6x6, 6x8, 6x12, 8x8 and 12x12. Triangles are made in 2", 3", 4", 6" and 8". All tiles are custom made to order. Special sizes and shapes are possible. Please inquire.

Trim and Accessories: SBN is available on all field tiles. Extruded shapes from the McIntyre Classic line are available. Feature strips, carved decorative and custom colors are all available. Basins, sinks and soapdishes are NOT available in North Coast glazes. However, complementary glazes may be selected from the Classic and Arts & Crafts Lines.
